

International

Definition:

- UK Outbound - your employee moving from the UK (Home) to anywhere in the world (Host)

Our Service and Price includes:

We will manage the relationship between your local HR departments, your employee and family and all involved suppliers - on a worldwide basis. We define and manage all expectations when moving internationally, ensuring that individual requirements are met. We take cross culture changes into consideration, language variations and time differences. Our management will include the end-to-end assignment, from the disconnect at Home until settling in at Host. We will liaise with overseas suppliers and through our approved supplier network we are able to extend cost-effective solutions.

World Connect Partners

We do not have our own overseas offices. However, through our 27 years of worldwide employee relocation experience we have established a very close link and network with overseas providers. In each specific country, we have partnered through our Supply Chain Management with destination service providers. Like us, our partners understand the complexity of international relocation and provide innovative and continuously enhanced services. Our partners' experience matches our own and as we are independent, we have selected our overseas providers based on service quality and value for money. By providing a stress-free, easily comprehensible and focused service, we make sure that the individual employees and their family is more productive and enjoyable during the international relocation phase.

We monitor every single relocation with quarterly updates and feedback, ensuring consistency in the programmes and compliance to corporate policies.

Benefits:

- Start Conversation with employee and family anywhere in the world
- Managing cross cultural differences, understanding different approaches, defining expectations
- Managing relationships with overseas, approved suppliers
- HCR will handle the administration and communications with foreign nationals
